

Angela van der Zee

Associate Architect

With Mecanoo since 2002

Professional qualifications Masters in Architecture, Delft University of Technology; Registered with the Bureau Architectenregister (NL)

"In order to create successful spaces you need to carry out research through multiple lenses. Insight into the emotional spirit and experiential qualities of people and place is therefore essential."

Angela has been involved in the design and development of numerous educational and healthcare projects where she has been able to apply her skill in empathetic design to maximum effect. She became part of the office's acquisition team in 2009 and continues to play an important role in the research, response and subsequent conceptualisation of a range of prospective international projects that cross multiple typologies.

Whilst completing her Master degree in Architecture, she spent a half year abroad at the University of Illinois Chicago to further her understanding of the local vernacular and broaden her understanding of American art and design. She has also travelled as part of a study delegation to research city density in India. Her thesis on the Oslo Opera House received honourable mention and was nominated for the national *Archiprix*.

Selected projects

Rijndam Rehabilitation Centre,
Rotterdam, NL

Size: 20,000 m²
Year: 2014 - 2019
