

Sylvie Beugels

Associate Architect

With Mecanoo since 1990

Professional qualifications MSc in Architecture, Delft University of Technology; Registered with the Bureau Architectenregister (NL)

“Good architecture involves teamwork. With regular client consultation sessions, a project team is able to grasp the essence of the task at hand.”

Sylvie has led exceptional and award-winning educational buildings and innovative residential projects to realisation including Sterren College, Haarlem, NL which won the 2013 *Lieven de Key Medal* for “phenomenal, original and inspiring” architectural qualities.

Sylvie understands that designing high-quality educational facilities and multi-family residential projects must involve everyone in an intensive process of listening, questioning, designing and expressing ideas. Sylvie is a committed team player and her design approach is defined by the cooperative engagement that she elicits within the team.

In Noorderpoort College, Stadskanaal and Calvijn Groene Hart, Barendrecht her teams produced designs that support both technical and user-oriented efficiency and occupancy. Residential projects such as: Kop van Oost, Groningen; Masterplan Tussen de Lanen, Doorwerth are illustrative of Sylvie’s commitment to creating contextual designs that serve occupants with sensitive and innovative architectural techniques.

By asking questions and anticipating requirements she defines the project essential, drawing out nuances to not only design spaces that are pleasant, warm and adaptable, but also above the client’s expectations.
