

Rodrigo Louro

Associate Architect

With Mecanoo since 2005

Professional qualifications Architecture and Urban Planning, Federal University of Rio de Janeiro, Brazil

"Architecture is about creating space and the way we use it. This is particularly important in a complex urban setting, establishing the relations between building and collective spaces"

Rodrigo has been with Mecanoo as an architect since 2005 after graduating as an architect and urban planner from the Federal University of Rio de Janeiro, Brazil in 2003. He also studied at the Faculty of Architecture at Oporto, Portugal in 2001. As a key player in Mecanoo's integrated design teams, Rodrigo has contributed to a broad range of public, cultural, commercial and mixed-use projects. He has developed complex schemes with international reach, such as Kaohsiung Station and Tainan Public Library, Taiwan; Hilton Hotel Schiphol Airport, Amsterdam, NL; Keukenhof, Lisse, NL.

Highly experienced in developing design visions based on comprehensive research and analysis, Rodrigo has a natural ability to translate concepts into buildings that reach beyond the site to enhance their local surroundings. Driven by a belief that good architectural practice is focused on people and collaboration, Rodrigo brings his international experience to deliver projects for a broad range of users.

Selected projects

Amstel Design District
Amsterdam, NL
